

DRAFT

Dear Warm Springs Interagency Funders Convening Participant,

Our planning committee is asking that each of you prioritize this short survey and complete it by Friday, September 20.

We are seeking your most candid feedback, thoughts and feelings and thoughts. We think it's essential that we share critical information openly are able to see and hear what others are going through in order to move forward as a group.

Your responses will be confidential but not anonymous. Meaning that WHO took the survey will be shared but NO information or quotes will be attributed to any person. We also will not alter the responses so that we will be sharing what you say as you say it and not how we might interpret it. (Please note that your responses could become part of public records and subject to public records requests).

The planning committee has been listening to the work happening at the sub-committee level and realize that there is critical information that needs to be shared with other parties which adds a level of complexity to the conversations we are having regarding what we need to do to move forward. The following questions will help us document those things:

~~1) What do we need to address in order to move forward? (open ended question)~~

12) What are the first four words that come to mind when you think about where we are at right now?

23) What urgent loose ends are you aware of that need to be tied up for your Agency/Tribe/Organization to move forward? Please be specific.

34) Please describe any Frustrations, Challenges, Barriers or Concern Fears you have for yourself OR on behalf of your Tribe/Organization/-Agency.

45) Think about the best possible outcome to the challenges before us. What would success look like, from your perspective? What's your single biggest long term goal?

56) What is your most immediate short term need?

67) What questions do you have for others around the table (list the Organization/group/Agency/Tribe and the question)?

71) What else do we need to address in order to move forward as a group? (open ended question).
